

Market Signals & Lead Scoring Recommendations v2

CTO Handoff Package for Tuning the LaunchHouse Events Agentic Outreach System

Prepared from the older Market Signal document, the Lead Enrichment Strategy, the Campaign Email Strategy, and the additional researched guidance in the working chat.

Core recommendation: Continue treating Cvent usage as a qualification gate, not a heavy scoring signal. Tune the agent to identify where a Cvent-using event team has an urgent operating reason to need outside execution support: event timing, hiring/capacity gaps, advanced Cvent complexity, reporting pressure, and the right buyer persona.

Prepared for	LaunchHouse Events
Date	May 15, 2026
Primary implementation model	Prompt and scoring tuning first; no architecture rewrite
Target model	Claude Sonnet 4.6 friendly handoff instructions
Geographic focus for job-signal research	USA and Canada only

Operating principle

Prioritize companies where public evidence shows the event team is scaling faster than its Cvent execution capacity.

Table of Contents

1. Re-anchor: what this document updates
2. System fit: why this is a tuning project, not a rebuild
3. Updated scoring model
4. Signal definitions and scoring logic
5. Event/Cvent hiring title library - USA and Canada
6. Cvent Certified profile signal
7. Event program + industry pattern library
8. ResearchAgent source priority and query upgrades
9. Score caps, tier rules, and false-positive controls
10. Campaign routing and messaging by signal
11. Minimal implementation plan for Claude Sonnet 4.6
12. QA test cases and acceptance criteria
13. Source basis and references

1. Re-anchor: What This Document Updates

This v2 report merges the older Market Signals report with the newer decisions made in the working session. The most important additions are the detailed event and Cvent job-title library, the Cvent Certified profile signal, the USA/Canada job-source focus, and the expanded event program title dictionary including incentive trips.

What changed from the prior PDF

Area	Prior version	Updated v2 direction
Weighting	Company fit / budget maturity was 5%.	Company fit is reduced to 4%. The extra 1% becomes a Cvent Certified profile signal.
Hiring signal	Event/Cvent hiring was recognized but not fully expanded.	Dedicated 20% signal with recruiter-style title taxonomy and public source guidance.
Program signal	Only a short list: user conferences, investor days, roadshows, summits, sales kickoffs, pharma/HCP, association conferences, chapter events.	Expanded repeatable event-program library, including conferences, trade shows, customer/user events, roadshows, investor events, SKOs, training/workshops, webinars, partner events, VIP/executive events, product launches, association/member events, and incentive trips.
Source focus	Broad USA/Canada/Europe list was discussed.	USA and Canada only for now. Europe sources like ESCO/EURES are intentionally excluded.
Architecture	Suggested schema enrichment fields.	Keep architecture and database schema stable. Prefer prompt tuning and existing JSONB storage. Add optional Pydantic fields only if needed by strict output validation.

Strategic re-anchor

Your agent should not ask: "Who uses Cvent?" It should ask: "Which Cvent-using event team has a real operating reason to need execution help now?" The best answer usually comes from compound evidence: a verified upcoming event, an event/Cvent hiring gap, visible Cvent complexity, reporting/data pressure, and a buyer who owns event operations or marketing operations.

2. System Fit: Tuning Project, Not Rebuild

The attached codebase documents show that the current platform already has the right workflow shape. Leads enter through CSV or manual import, then move through web research, company/contact enrichment, lead scoring, campaign assignment, personalization, and SendGrid delivery. The Lead Enrichment Strategy describes a ResearchAgent, EnrichmentAgent, ScoringAgent, and PersonalizationAgent, with outputs persisted to research_data, enrichment_data, ai_insights, lead_scores, and messages. The Campaign Email Strategy shows the T1-T17 template system and a strict T8 priority for verified events 31-120 days out.

Implication for CTO handoff

Do not redesign the architecture. Do not add new workers, new queues, new campaign tables, or new external systems for this tuning pass. The fastest and safest path is to update prompts, score weights, source queries, and the evidence extraction logic while using the existing JSONB-friendly storage model.

Existing system elements to preserve

System area	Preserve	Tune only
ResearchAgent	Current web synthesis pattern using Tavily primary, Firecrawl fallback/scrape, and Claude synthesis.	Add targeted job, event-program, Cvent Certified, advanced module, and MarTech search queries.
EnrichmentAgent	Firmographic/contact enrichment and confidence scoring.	Ask for structured signal extraction using existing JSON outputs. Optional new fields only if strict schema requires it.
ScoringAgent	0-100 score, Hot/Warm/Cold tiers, signal_scores JSONB, explanation, recommended_action.	Replace old weighting with v2 weighting and add score caps.
PersonalizationAgent	T1-T17 playbook, especially T7 rush and T8 build scoping.	Pass primary signal driver so messaging is event-led, capacity-led, complexity-led, or reporting-led.
Database	Existing tables and JSONB fields.	No new tables. No DB migration unless code-level Pydantic schema validation blocks optional fields.

Minimum-change storage recommendation

Use existing flexible locations first: research_data.metadata, enrichment_data.data, ai_insights.content, lead_scores.signal_scores, lead_scores.explanation, lead_scores.recommended_action, and message.personalization_hooks. If the current Pydantic models reject additional keys, make a minimal code-only change by adding optional fields to the relevant output models. This is not a database architecture change.

3. Updated Scoring Model

This model keeps dynamic buying signals ahead of static firmographics. Cvent usage remains a gate: a company that does not use or plausibly evaluate event technology can still be nurtured, but heavy scoring should come from operational pressure.

Signal	Weight	Reason
Verified upcoming event urgency	24%	Hard deadline. 31-120 days is the strongest build-scoping window; 0-30 days is rush support; 120+ days is planning/nurture.
Event/Cvent hiring and capacity gap	20%	Best public proxy for capacity strain, team scaling, specialized Cvent need, or interim execution gap.
Cvent complexity / advanced module usage	16%	Advanced modules and attendee-facing complexity create delivery risk and higher willingness to pay.
MarTech, reporting, and data pressure	14%	If event data must flow into Salesforce, HubSpot, Marketo, Snowflake, Data Cloud, or reporting workflows, Cvent setup quality becomes a business issue.
Buyer/persona authority	12%	The right buyer or influencer determines whether the signal can convert into a meeting.
Event program + industry pattern	9%	Repeatable, high-stakes B2B event motions predict ongoing Cvent execution need.
Company fit / budget maturity	4%	Guardrail only. Size and maturity help affordability but do not prove intent.
Cvent Certified profile signal	1%	Small bonus when a relevant public person profile shows Cvent Certified or a named Cvent certification.

Important scoring behavior

- Hot scores should normally require at least two strong dynamic signals. Do not let one weak signal create urgency.
- Cvent usage alone should never create a Hot lead. It confirms fit, not timing.
- The 1% Cvent Certified signal is not a major buying signal by itself. It is a sophistication indicator and a credibility booster.
- Company fit is intentionally low at 4% to prevent large companies with no visible pain from outranking smaller accounts with real deadlines and capacity gaps.

4. Signal Definitions and Scoring Logic

Signal	What the agent should look for	How to score
Verified upcoming event urgency	Official event page, company event calendar, Cvent registration page, press release, industry calendar, agenda, registration page, or microsite with a future date.	31-120 days = maximum. 0-30 days = high but route to rush. 120+ days = nurture/planning. No future date = cap the temporal score.
Event/Cvent hiring and capacity gap	Open jobs for event operations, meetings/events, registration operations, event technology, Cvent administration, field marketing, marketing operations, demand generation, event data, or RevOps roles.	Score by role specificity, Cvent mentions, advanced module mentions, integration/reporting language, number of open roles, and posting age. Multiple open roles or Cvent-specific wording = very high.
Cvent complexity / advanced modules	Mentions/public evidence of Attendee Hub, OnArrival, Appointments, mobile event app, exhibitor/sponsor tools, payments, housing, travel module, multi-track sessions, approvals, complex pricing, or registration paths.	More modules and more attendee-facing risk = higher score. Evidence from event pages or job descriptions is stronger than generic platform claims.
MarTech, reporting, and data pressure	Salesforce, HubSpot, Marketo, Snowflake, Data Cloud, Cvent Data Bridge, event attribution, campaign reporting, lead flow, CRM sync, pipeline reporting, data hygiene, or marketing operations language.	High when event data is tied to revenue reporting, pipeline, attribution, marketing operations, or executive reporting.
Buyer/persona authority	Head/Director/VP Events, Event Operations, Event Technology, Field Marketing, Demand Gen, Marketing Ops, RevOps, CMO/COO in SMB.	Highest for budget owners and operational owners. Lower for junior coordinators unless paired with clear pain.
Event program + industry pattern	Repeatable program titles such as Annual Conference, User Conference, Customer Summit, Partner Summit, Roadshow, Investor Day, Sales Kickoff, Trade Show, Webinar, Executive Roundtable, Product Launch, Member Summit, Incentive Trip, Presidents Club, Winner Circle, or Recognition Trip.	Score event motion more than industry label. Repeatability, audience complexity, attendee volume, travel/housing, sponsors/exhibitors, sessions, and stakeholder pressure matter.
Company fit / budget maturity	Mid-market to enterprise, commercial events, dedicated event staff, and enough event volume to justify outside support.	Keep low. Use as a guardrail rather than a major intent driver.
Cvent Certified profile signal	Public profiles or bios mentioning Cvent Certified, Cvent Certification, Cvent Event Management Certified, Cvent Attendee Hub Certified, Account Administrator, System Administrator, or related product certification.	Add the 1% signal when found on a relevant contact, current employee, event ops owner, marketing ops owner, or event technology owner profile.

5. Event/Cvent Hiring Title Library - USA and Canada

This section is designed for the Event/Cvent hiring and capacity gap signal. It uses a recruiter lens: title specificity, ownership scope, and technical language matter more than broad marketing titles. The agent should search for title variants and then inspect the job description for Cvent, registration, event technology, integrations, reporting, and advanced module terms.

Tier 1 - Direct event operations titles

Title group	Exact titles / variants to search	Scoring note
Coordinator / Specialist	Event Coordinator; Events Coordinator; Event Co-ordinator; Events Co-ordinator; Event Specialist; Events Specialist; Event Operations Specialist; Special Events Coordinator.	Medium by default. Higher if paired with Cvent, registration, attendee management, or complex event program language.
Manager	Event Manager; Events Manager; Senior Event Manager; Sr. Event Manager; Event Program Manager; Events Program Manager; Strategic Events Manager; Manager, Strategic Events; Global Events Manager; Corporate Event Planner; Project Manager, Corporate Event Planner.	Medium-high. Stronger when role owns registration, Cvent, attendee comms, or event platform execution.
Operations / leadership	Event Operations Manager; Events Operations Manager; Event Operations Director; Events Operations Director; Director of Events; Director, Events; VP Events; Vice President, Events; Head of Events; Head of Event Operations.	High. These are strong capacity and budget/ownership indicators.

Tier 2 - Meetings, conferences, conventions, trade show titles

Title group	Exact titles / variants to search	Scoring note
Meetings	Meeting Planner; Meetings Planner; Meeting Coordinator; Meetings Coordinator; Meeting Manager; Meetings Manager; Senior Meeting Planner; Director of Meetings; Director, Meetings; Director of Meetings and Events; Director, Meetings & Events; Manager, Meetings and Events; Meetings and Events Manager.	High for associations, healthcare, pharma, finance, professional services, and enterprise internal programs.
Conferences / conventions	Conference Planner; Conference Coordinator; Conference Organizer; Conference Manager; Conference Planning Manager; Conference Services Manager; Conference Services Director; Convention Coordinator; Convention Planner; Convention Services Manager; Convention Services Director.	Medium-high to high. These titles often indicate registration-heavy and agenda/session-heavy programs.
Trade shows / exhibitions	Trade Show Planner; Trade Show Manager; Trade Show Coordinator; Trade Show Organizer; Exhibition Coordinator; Exhibition Manager; Exhibitor Manager; Sponsor Operations Manager.	High when sponsors, exhibitors, booths, lead capture, appointments, badges, or onsite logistics appear.

Tier 3 - Marketing-owned event titles

These titles should be searched, but they should only score high when the job description mentions events, Cvent, registration, trade shows, field marketing programs, roadshows, customer conferences, event data, or marketing operations.

Title group	Exact titles / variants to search	Scoring note
Field marketing	Field Marketing Manager; Senior Field Marketing Manager; Regional Marketing Manager; Field Marketing Director; Director of Field Marketing; Event Marketing Manager; Events Marketing Manager; Senior Events Marketing Manager; Marketing Events Manager; Marketing Manager, Events; Marketing Manager, Events and Digital Programs.	High when tied to event calendars, roadshows, trade shows, customer/partner events, or Cvent/event platforms.
Marketing leadership	Director of Marketing; VP Marketing; Vice President Marketing; Director, Brand Experience and Events; Director of Brand Experience; Marketing Communications Coordinator; Marketing & Communications Coordinator.	Medium alone; high only when events are a core part of the role or paired with verified event program evidence.
Demand / ops / RevOps	Demand Generation Manager; Director of Demand Generation; Marketing Operations Manager; Director of Marketing Operations; RevOps Manager; Revenue Operations Manager; Campaign Operations Manager.	High when event attribution, lead flow, CRM sync, Salesforce/Marketo/HubSpot, or event data is mentioned.

Tier 4 - Cvent / event technology specific titles

Title group	Exact titles / variants to search	Scoring note
Cvent-specific	Cvent Administrator; Cvent Admin; Cvent Specialist; Cvent Event Manager; Cvent Registration Manager; Cvent Platform Manager; Cvent Event Specialist.	Very high. Direct proof that the company has specialized Cvent workload.
Registration / attendee operations	Event Registration Manager; Registration Manager; Registration Operations Manager; Attendee Registration Manager; Attendee Services Manager; Attendee Experience Manager; Event Data Manager; Events Database Manager.	High to very high. Maps closely to LaunchHouse execution work.
Event technology / systems	Event Technology Manager; Event Technology Lead; Event Technology Specialist; Event Systems Manager; Event Platform Manager; Event Systems Administrator; Marketing Operations, Events; Event Operations, Event Technology, CVENT.	Very high when combined with Cvent, integrations, Attendee Hub, OnArrival, or reporting language.

Title scoring ladder

Evidence found	Signal strength	Interpretation
Generic Event Coordinator / Event Planner role	Medium	Event program exists, but may be logistics-only.
Event Manager / Senior Event Manager / Meetings & Events Manager	Medium-high	Likely event ownership and recurring programs.
Event Operations / Event Technology / Registration Manager	High	Operational complexity and platform ownership.
Role mentions Cvent	Very high	Direct proof of Cvent workload or platform dependency.
Role mentions Attendee Hub, OnArrival, registration, integrations, Salesforce, Marketo, HubSpot, reporting	Very high	Maps directly to LaunchHouse Cvent execution capabilities.
Multiple event/field marketing/marketing ops roles open	Very high	Program expansion or capacity strain.
Role open 30+ days	High	Potential hiring gap; team may need interim execution support.
Role open 60+ days	Very high	Hiring friction; outside execution support becomes more urgent.
Cvent-specific role + verified event 31-120 days away	Red-hot	Event deadline plus capacity/skills gap.

6. Cvent Certified Profile Signal

Add this as a distinct 1% signal. It is intentionally small because certification alone does not prove buying intent. However, it is a useful sophistication signal. It tells the agent that the account has someone close to Cvent operations, and that event technology is mature enough to matter.

Who can trigger the signal

- The target contact has Cvent Certified or a named Cvent certification in a public profile or bio.
- A current employee in Events, Event Operations, Event Technology, Marketing Operations, Field Marketing, Demand Gen, or RevOps has Cvent Certified language.
- A visible event technology owner lists Cvent certification or Cvent administration expertise.
- Do not apply the signal to unrelated people or stale former employees unless the profile clearly suggests current relevance.

Search terms

```
"{company_name}" AND ("Cvent Certified" OR "#CventCertified" OR "Cvent Certification")
"{company_name}" AND ("Cvent Event Management Certified" OR "Cvent Attendee Hub Certified")
"{contact_name}" AND ("Cvent Certified" OR "Cvent Certification" OR "Cvent Event Management")
```

Certification keyword library

Keyword / phrase to look for	Use
Cvent Certified; #CventCertified; Cvent Certification	General profile evidence.
Cvent Event Management Certified; Event Management Certification; Event Management Advanced	Strong for event build ownership.
Cvent Attendee Hub Certified; Attendee Hub Certification	Strong for attendee experience/mobile/hybrid complexity.
Cvent Account Administrator Certification; Account Administrator	Strong for account configuration, permissions, and program governance.
Cvent System Administrator Certification; System Administrator	Strong for strategic meetings management/account administration and user settings.
Cvent Venue Sourcing Certification; Supplier Network Certification; Cvent Diagramming and Seating Certification	Supportive, especially when onsite, venue, housing, travel, or floor plans are visible.
Cvent Event-Led Growth Certification; Virtual Events; Hybrid Events; Passkey Planner; Jiffilenow Meeting Manager	Supportive depending on program type and modules.

Scoring rule

If the certification evidence is clear and attached to a relevant current person, award the 1% signal. If it is ambiguous, stale, or only visible in a low-confidence snippet, store it as evidence but do not award the point until confirmed.

7. Event Program + Industry Pattern Library

The agent should score event motion more than broad industry label. A repeatable, registration-heavy, attendee-facing program is a stronger signal than a company simply being in a high-fit vertical. The goal is to detect event programs that commonly produce Cvent build work, attendee data complexity, stakeholder pressure, and repeatable operational load.

Priority	Program type	Common titles / keywords	Why it matters
1	Annual conference / summit	Annual Conference; Annual Meeting; Annual Convention; Global Summit; Leadership Summit; Executive Summit; Business Summit; Industry Summit; Symposium; Congress; Convention.	Large, repeatable, multi-session, stakeholder-heavy, and registration-heavy.
2	User / customer conference	User Conference; Customer Conference; Client Conference; Customer Summit; User Summit; User Group; Community Summit; Customer Forum.	Strong B2B signal: sessions, speakers, sponsors, mobile app, attendee comms, reporting.
3	Trade show / expo / exhibition	Trade Show; Tradeshow; Expo; Exhibition; Exhibitor Event; Industry Expo; Partner Expo; Vendor Expo.	Exhibitors, sponsors, booths, lead capture, badges, onsite and appointments complexity.
4	Roadshow / regional event series	Roadshow; Executive Roadshow; Product Roadshow; Investor Roadshow; Regional Roadshow; City Tour; Multi-City Event; Regional Forum.	Repeatable city-by-city execution, localization, templates, speed pressure.
5	Investor / analyst events	Investor Day; Analyst Day; Capital Markets Day; Management Day; Shareholder Meeting; Annual General Meeting; Earnings Presentation.	High-stakes executive visibility, financial services/public company relevance, precise attendee control.
6	Sales kickoff / internal commercial events	Sales Kickoff; SKO; Revenue Kickoff; GTM Kickoff; Partner Kickoff; National Sales Meeting; Leadership Offsite; Executive Offsite.	Large internal audiences, sessions, app, travel, agenda, communications, and executive messaging.
7	Training / workshop / seminar	Training; Workshop; Seminar; Bootcamp; Masterclass; Academy; Certification Day; Learning Series; Education Day.	Repeatable programs often tied to registration, learning, attendance tracking, certificates, or surveys.
8	Webinar / virtual / hybrid	Webinar; Virtual Event; Hybrid Event; Online Summit; Virtual Conference; Webcast; Digital Event; Live Broadcast.	Useful when paired with Cvent, Attendee Hub, integrations, recurring campaigns, or content libraries.
9	Partner / channel events	Partner Summit; Channel Partner Summit; Partner Conference; Partner Forum; Alliance Summit; Partner Day; Distributor Conference.	Segmented audiences, partner tiers, executive stakeholders, sponsors, and repeatable programs.
10	VIP / executive / networking events	VIP Event; Executive Dinner; Executive Roundtable; Leadership Dinner; Networking Reception; Client Reception; Customer Dinner; C-Suite Roundtable.	High value when attached to roadshows, account-based marketing, partner programs, or flagship events.
11	Product launch / showcase	Product Launch; Launch Event; Product Showcase; Demo Day; Innovation Day; Solution Showcase; Experience Center Event.	Marketing-owned event signal; often tied to customer/partner campaigns and data capture.
12	Association / chapter / member events	Chapter Meeting; Annual Chapter Conference; Member Meeting; Member Summit; Association Conference; Board Meeting; Committee Meeting.	Repeatable member-based logic, discounts, registration types, chapters, approvals, and reporting.
13	Incentive trips / recognition travel	Incentive Trip; Incentive Travel; President Club; Presidents Club; Chairman Club; Winner Circle; Top Performer Trip; Sales Incentive Trip; Partner Incentive Trip; Dealer Incentive Trip; Recognition Trip; Rewards Trip; Awards Program; Achievers Club; Circle of Excellence.	Travel, guest management, qualification, approvals, rooming lists, activities, VIP handling, and communications can create significant Cvent complexity.

Event-title dictionary for the agent

Use this as the keyword library for event-title extraction, event calendar parsing, query expansion, and scoring. The agent should not treat all keywords equally: repeatability, audience complexity, source quality, and proximity to Cvent execution matter.

Annual Conference; Annual Meeting; Annual Convention; Global Conference; National Conference; Regional Conference; Industry Conference; User Conference; Customer Conference; Client Conference;
 Partner Conference; Association Conference; Annual Summit; Global Summit; Customer Summit; User Summit; Partner Summit; Leadership Summit; Executive Summit; Industry Summit; Business Summit;
 Community Summit; Forum; Customer Forum; Partner Forum; Executive Forum; Regional Forum; Symposium;
 Congress; Convention; Trade Show; Tradeshow; Expo; Exhibition; Exhibitor Event; Roadshow; Executive Roadshow; Product Roadshow; Investor Roadshow; Regional Roadshow; City Tour; Multi-City Event;
 Investor Day; Analyst Day; Capital Markets Day; Management Day; Shareholder Meeting; Annual General Meeting;
 Sales Kickoff; SKO; Revenue Kickoff; GTM Kickoff; Partner Kickoff; National Sales Meeting; Leadership Offsite;
 Executive Offsite; Training; Workshop; Seminar; Bootcamp; Masterclass; Academy; Certification Day;
 Learning Series; Education Day; Webinar; Virtual Event; Hybrid Event; Online Summit; Virtual Conference;
 Webcast; Digital Event; Partner Day; Alliance Summit; Channel Partner Summit; VIP Event; Executive Dinner;
 Executive Roundtable; Leadership Dinner; Networking Reception; Client Reception; Customer Dinner;
 Product Launch; Launch Event; Product Showcase; Demo Day; Innovation Day; Solution Showcase; Chapter Meeting; Member Meeting; Member Summit; Board Meeting; Committee Meeting; Incentive Trip;
 Incentive Travel; Incentive Program; Incentive Event; President Club; Presidents Club; Chairman Club;
 Winner Circle; Winners Circle; Top Performer Trip; Sales Incentive Trip; Partner Incentive Trip; Dealer Incentive Trip; Distributor Incentive Trip; Franchise Incentive Trip; Recognition Trip; Rewards Trip;
 Reward Travel; Recognition Event; Awards Trip; Awards Program; Club Trip; Elite Club; Achievers Club;
 Circle of Excellence; Excellence Trip

Program scoring rules

Evidence	Score guidance
One generic event title only, no date or registration page	Low
Event title matches one of the above program types	Medium
Repeatable language: annual, regional, global, series, roadshow, chapter, summit, club, incentive program	Medium-high
Event has registration page, agenda, speakers, sponsors, exhibitors, sessions, attendee portal, rooming/travel, or event app	High
Event is B2B/commercial and tied to customers, partners, investors, members, sales, field marketing, recognition, or incentive travel	High
Multiple events in a calendar or multi-city roadshow/event series	Very high
Event title + Cvent registration page + 31-120 day timing	Hot-tier supporting signal

8. ResearchAgent Source Priority and Query Upgrades

For USA and Canada, the agent should focus on high-trust company-owned hiring surfaces and common ATS domains. Government occupation databases are useful for title normalization, but they should not be treated as the main live hiring source for account-level scoring.

Top 10 realistic job-signal sources - USA and Canada

Priorit y	Source	Use in agent
1	Company careers pages	Highest-trust account-level source. If the company itself lists an event/Cvent role, use as primary evidence.
2	Greenhouse - boards.greenhouse.io / job-boards.greenhouse.io	Strong for SaaS, tech, and growth companies. Use for live event, field marketing, marketing ops roles.
3	Lever - jobs.lever.co	Common in tech/SaaS. Useful for event marketing, field marketing, and marketing ops roles.
4	Workday - myworkdayjobs.com	Common in enterprise, healthcare, finance, universities, and larger Canadian/U.S. companies.
5	Ashby - jobs.ashbyhq.com	Modern SaaS/high-growth companies. Useful for field marketing, demand gen, marketing ops, event roles.
6	SmartRecruiters - jobs.smartrecruiters.com	Mid-market and enterprise postings. Good secondary live-job source.
7	iCIMS - icims.com career sites	Enterprise, associations, healthcare, hospitality, education, corporate roles.
8	Jobvite - jobs.jobvite.com	Secondary ATS source for U.S. and Canadian company careers pages.
9	Canada Job Bank	Canada-specific occupation/job discovery and title validation for NOC 12103 conference and event planners.
10	LinkedIn public search snippets	Only for public profile signals such as Cvent Certified, current title, event technology ownership. Do not depend on private/locked data.

Title-normalization references, not primary live-job sources

Source	Use
O*NET	U.S. official title taxonomy for meeting, convention, and event planners.
CareerOneStop	U.S. occupation validation and role description.
Canada Job Bank / NOC	Canadian occupation description, title variants, and market context.
WorkBC	Canadian title variants such as conference coordinator, event planner, meeting planner, special events organizer, trade show planner.

Core ResearchAgent query pack

```

"registration")
```

9. Score Caps, Tier Rules, and False-Positive Controls

Because the system relies on public web search, homepage scraping, and search snippets rather than direct Cvent event calendar access, the scoring model needs strict evidence controls. This protects premium positioning and prevents inaccurate personalization.

Scenario	Maximum score / cap	Reason
Only proof is that the company uses Cvent	45	Cvent usage is a gate, not intent.
No verified event, no hiring signal, no complexity signal	65	Good-fit account, but no strong reason to act now.
No relevant buyer/persona found	70	Company may fit, but outreach quality and conversion likelihood drop.
Event inferred but no specific future date	Temporal score capped at 40% of urgency signal	Avoid hallucinated dates and false urgency.
Low source confidence across key claims	Cannot be Hot	Premium outreach cannot rely on shaky personalization.
Generic funding news only	No score lift unless tied to event expansion	Funding does not automatically mean Cvent/event ops need.
Job posting mentions events but no Cvent/registration/platform language	Capacity signal capped at Medium	Could be logistics-only hiring.
Cvent Certified found only in stale or ambiguous profile snippet	No 1% bonus until confirmed	Avoid over-scoring weak profile evidence.
Event program keyword is generic and no date/registration page exists	Program signal capped at Medium	Event title alone is not enough.

Tier definitions

Tier	Score	Required evidence	Sales action
Hot	75-100	At least two strong dynamic signals, such as verified event + Cvent hiring, verified event + advanced module complexity, or hiring + MarTech/reporting pressure with right buyer.	Prioritize. Use event-led, capacity-led, complexity-led, or reporting-led outreach.
Warm	55-74	Good ICP with one strong dynamic signal or several medium signals.	Personalized sequence. Re-enrich in 60-90 days or sooner if a new event trigger appears.
Cold / nurture	0-54	Cvent usage or good industry fit but no urgency, capacity, complexity, or reporting pressure.	Hold, low-touch nurture, or skip.

Strategic rule

A Hot lead should rarely be produced by one signal alone. The best scoring model rewards compound pain: event deadline + capacity gap + Cvent complexity + right buyer.

10. Campaign Routing and Messaging by Signal

The signal that drives the score should also drive the outreach angle. This keeps emails contextual and prevents generic Cvent support messaging.

Primary driver	Recommended template path	Messaging angle	Avoid
Verified event 31-120 days out	T8 Build Scoping	Scope is being locked; LaunchHouse handles fixed-fee Cvent implementation before the rush.	Do not sound like generic staff augmentation.
Verified event 0-30 days out	T7 Rush	Final-stretch support for unresolved registration, Attendee Hub, or integration issues.	Do not overpromise large rebuilds without scoping.
Event/Cvent hiring gap	T6 or capacity-led T1	Bridge Cvent/event ops capacity while the internal team scales.	Do not quote job titles too directly in the opening.
Cvent complexity	T1/T6 or T8 if event exists	Registration architecture, multi-track setup, onsite/mobile, Attendee Hub, integrations.	Do not mention modules unless evidence is strong.
MarTech/reporting pressure	T6 or T9 if news-triggered	Cleaner Cvent setup improves downstream reporting and CRM/event data flow.	Do not make vague ROI claims.
Program pattern only	T6 Fit-Based	Overflow capacity for repeatable event programs.	Do not create false urgency.
Cvent Certified only	No dedicated template	Use as background sophistication signal, not as the hook.	Do not say "I saw you are Cvent Certified" in cold outreach.

Capacity-led email language

Use softer wording that signals relevance without making the prospect feel watched:

"Noticed your events team appears to be scaling its Cvent/event operations capacity. We help teams bridge that gap on fixed-fee Cvent builds when registration, Attendee Hub, or reporting work needs to move before internal bandwidth catches up."

Seniority adaptation

- For Directors, VPs, and Heads of Events: use strategic language - overflow capacity, risk reduction, scope, fixed-fee, timeline certainty.
- For coordinators and specialists: use tactical language - registration logic, Attendee Hub cleanup, OnArrival, reporting, integrations, QA, rush turnarounds.
- For Marketing Ops / Demand Gen / RevOps: use data language - event attribution, CRM sync, lead flow, campaign reporting, clean setup before reporting.
- For CMO/COO in SMB: use business-risk language - attendee experience, team bandwidth, execution certainty, no long-term retainer.

11. Minimal Implementation Plan for Claude Sonnet 4.6

This section is written so it can be handed directly to Claude Sonnet 4.6 as a CTO implementation brief. The goal is clean, targeted tuning with minimal architectural impact.

Non-negotiable constraints

- Do not redesign the pipeline. Preserve ResearchAgent -> EnrichmentAgent -> ScoringAgent -> PersonalizationAgent.
- Do not add new database tables or change core lead/campaign lifecycle.
- Prefer prompt/config changes and existing JSONB storage.
- Only add optional Pydantic fields if strict JSON parsing rejects the new output keys. No migration should be needed for JSONB-backed stored data.
- Every high score must have an evidence chain with source type and confidence.
- Do not use event dates or job claims in email copy unless source confidence is high.

Implementation phases

Phase	Change	Expected code impact
1. Scoring weights	Replace old 10-signal score prompt with the v2 8-signal model.	ScoringAgent prompt/config only. lead_scores.signal_scores remains JSONB.
2. Research query expansion	Add USA/Canada job-source, ATS, title-library, program-title, Cvent Certified, and MarTech queries.	ResearchAgent query list/prompt. No new data provider required.
3. Evidence extraction	Ask EnrichmentAgent to extract event_hiring_signals, program_pattern_signals, cvent_certified_profile_signal, cvent_complexity_signals, and source_confidence.	Prefer optional JSON keys in enrichment_data.data. If Pydantic is strict, add optional model fields only.
4. Score caps	Implement hard cap logic in the ScoringAgent prompt or deterministic post-processing.	Prompt first; deterministic code cap optional if current architecture supports it easily.
5. Personalization driver	Expose recommended_template_driver and top evidence snippets to PersonalizationAgent.	Use existing ai_insights/research/enrichment context and message.personalization_hooks.
6. QA review	Show or store top 3 evidence snippets behind every Hot score.	Use existing ai_insights or lead_scores.explanation. UI changes optional, not required for scoring tune.

Recommended optional JSON keys

ScoringAgent instruction block

Score using the v2 LaunchHouse market signals model:

- Verified upcoming event urgency: 24%
- Event/Cvent hiring and capacity gap: 20%
- Cvent complexity / advanced module usage: 16%
- MarTech, reporting, and data pressure: 14%
- Buyer/persona authority: 12%
- Event program + industry pattern: 9%
- Company fit / budget maturity: 4%
- Cvent Certified profile signal: 1%

Treat Cvent usage as a gate, not a high-weight signal. For each score, provide:

1. numeric sub-score from 0.0 to 1.0,
2. source-backed reasoning,
3. source confidence,
4. score caps applied, if any,
5. recommended_template_driver.

Never score a lead Hot if the key evidence is low confidence.

12. QA Test Cases and Acceptance Criteria

These test cases help validate whether the signal tuning works before production rollout.

Scenario	Evidence	Expected score / tier	Expected routing
Red-hot compound	Verified customer conference 58 days out; open Event Operations Manager role mentioning Cvent, Attendee Hub, Salesforce; Director of Events contact.	85-95 / Hot	T8 with capacity-aware personalization.
Hot event complexity	Annual summit 80 days out; Cvent registration page; agenda shows multi-track sessions; Head of Field Marketing contact.	78-88 / Hot	T8 build scoping angle.
Capacity-led warm/high	Open Cvent Administrator role and Marketing Operations role; no verified upcoming event.	65-75 / Warm or Hot only if source confidence and role specificity are very high	T6 or capacity-led T1. Re-enrich monthly for event trigger.
Program pattern high	Company lists annual incentive trip / Presidents Club with registration and travel/housing details; no Cvent evidence but event tech likely.	58-72 / Warm	Fit-based sequence; no false Cvent-specific claim.
Certification-only	Public profile shows Cvent Certified, but no event timing, hiring, complexity, or reporting pressure.	Do not exceed Warm from certification alone	Use certification only as background scoring; no certification-led email hook.
Nurture	Known Cvent user in high-fit industry, but no event timing, hiring, complexity, program pattern, or data pressure visible.	35-50 / Cold or nurture	Hold or low-touch nurture.

Acceptance criteria

- All Hot leads include at least two strong dynamic signals or one very strong signal plus a high-confidence buyer/persona match.
- Every event-based Hot score includes a source URL and future date; inferred dates do not trigger T7/T8.
- Every hiring-based high score includes title, source type, role specificity, and whether Cvent/platform terms were present.
- Cvent Certified signal contributes exactly 1% maximum and never overrides score caps.
- Company fit contributes 4% maximum and never compensates for absent buying signals.
- Generated emails avoid surveillance language around job postings and profile certifications.
- No new database tables are required for v2 rollout.

13. Source Basis and References

Internal source documents reviewed

Document	Used for
LaunchHouse_Market_Signals_Lead_Scoring_Report.pdf	Older market-signal report and baseline structure.
Lead_Enrichment_Strategy.pdf	Current enrichment architecture, ResearchAgent, EnrichmentAgent, ScoringAgent, data model, current 10-signal scoring model, ResearchOutput, lead_scores, ai_insights, and current limitations.
Campaign_Email_Strategy.pdf	Campaign lifecycle, T1-T17 template playbook, T7/T8 timing logic, seniority tone rules, reply classification, and messaging constraints.
Gemini Cvent Lead Scoring Signal Research.docx / working chat notes	Strategic recommendation to move from platform-presence scoring to operational distress, capacity, technical debt, event urgency, and MarTech pressure.

External public validation sources

Source	What it validates
O*NET - Meeting, Convention, and Event Planners, 13-1121.00	U.S. official title taxonomy including Event Coordinator, Events Manager, Conference Planner, Conference Services Manager, Convention Services Manager, Special Events Coordinator.
CareerOneStop - Meeting, Convention, and Event Planners	U.S. occupation description: coordinating staff, convention personnel, clients, group meetings, events, conventions.
Canada Job Bank - Conference and Event Planners / NOC 12103	Canadian description covering conferences, conventions, meetings, seminars, exhibitions, trade shows, festivals, and other events.
WorkBC - Conference and Event Planners	Canadian title variants such as Conference Coordinator, Event Planner, Meeting Planner, Special Events Organizer, Trade Show Planner.
Cvent Event Types Learning Center	Event category validation: Conference, Networking Event, Trade Show, Internal Event, Sales Kickoff, Training/Workshop, and related event types.
Cvent Roadshow Event Ideas	Roadshows as repeatable event programs with multi-city execution and repeatable setup.
Cvent Certification pages	Cvent certification categories including Event Management, Event Management Advanced, Attendee Hub, Account Administrator, System Administrator, and event professional certifications.
SITE Global - What is Incentive Travel	Incentive travel as a reward/recognition and performance-enhancement program.
Incentive Research Foundation	Incentive travel, motivational meetings, recognition, and non-cash reward research.

Implementation note on evidence

The title and event-program libraries are intentionally broad enough for recall, but scoring must remain evidence-weighted. The agent should search broadly, then score narrowly based on source confidence, role specificity, Cvent/event-tech language, program repeatability, and event timing.

Final recommendation

Use Cvent presence as a gate. Use event titles, job postings, profile certification signals, event-program patterns, and technical/data language to understand buying intent. Prioritize accounts where public evidence shows that event delivery has become operationally important and internal Cvent capacity may not be keeping up.
